

Post Oak Savannah Groundwater Conservation District

Public Notice of Historic Use Applications filed with the District

Below is a list of applicants who have applied to the Post Oak Savannah Groundwater Conservation District (POSGCD) for Historic Use of groundwater according to the Rules of the POSGCD.

POSGCD Rule 7.14 (7) states: It is the intent of the District to determine existing and historic use of groundwater within the District as set forth under this rule.

POSGCD Rule 7.14(1) states: An owner of an existing non-exempt well that was completed and operational prior to the effective date (March 9, 2004), and that produced and used groundwater in any year during the existing and historic use period, shall apply to the District for an historic use permit. The application must be filed on or before December 30, 2005. Failure of an owner of such a well to apply for an historic use permit on or before December 30, 2005, shall preclude the owner from making any future claim or application to the District for an existing or historic use under these rules. The failure of a well owner to file an application for an historic use permit on or before December 30, 2005 shall cause the owner to forfeit his rights and ability to operate the well under these rules, unless the owner thereafter applies for and obtains an operating permit that authorizes production from the well.

POSGCD Rule 7.14(3) states: The District shall publish notice of the recommended proposed permits or denials and make such recommendations available for public review and inspection. Any applicant or any affected party shall have 90 days from the date of the above notice to file a request for hearing. The Board shall consider the proposed historic use permit application and any other evidence presented by an affected party prior to making its decision.

Below is a list of the recommended proposed Historic Use Permits containing the following information: Name and address of the permittee, Location of well, Use of the groundwater, and volume of production (volumes are stated in GPD (gallons per day) or Acre Feet (acre feet per year; whereas one acre foot= 325,851 gallons).

Recommended Proposed Historical Use Permits as of September 15, 2005:
