Re: Firm Yield Awareness

Dear District Representatives:

In developing the next round of DFCs, the Firm Yields of our aquifers and programs are important aspects for preventing dewatering areas of the aquifers that may impact the availability of water during critical periods of drought as well as terrestrial and near surface subterrestrial soil environments and need to be included in the consideration of impacts in section 36.108(d) review.

Please accept the attached Power Point presentation entitled, "*Firm Yield Defined.*" Thank you for the privilege of submitting this soil science report for your consideration.

With kindest regards,

T. Barret Lyne
