

MONITORING NETWORK CURRENT UPDATE

POSGCD BOARD MEETING APRIL 14, 2015

15. Management Goals, Objectives, & Performance Standards

15.1 Efficient Use of Groundwater

Management Objectives:

1. The District will maintain a monitoring well network with at least 50 monitoring wells to provide coverage across management zones and aquifers within the District. The District will measure water levels at the monitoring well locations at least once every calendar year. A written analysis of the water level measurements from the monitoring wells will be made available through a presentation to the Board of the District at least once every three years.

Performance Standards:

- 1. Maintain a monitoring well network and its criteria, and measure at least 50 monitoring wells at least once every calendar year.
- 2. Number of monitoring wells measured annually by the District.

2015 Water Level Measurements

The table to the right is preliminary data that will be submitted to the Texas Water Development Board (TWDB) for the district's annual water level measurements.

Measurements were taken between 2/18/2015 and 4/??/2015.

The district utilizes a variation of methods to obtain level measurements

- Steel Tape
- E-line
- Sonic recorder
- Pressure Transducer
