Re: Proposed Desired Future Conditions for the Aquifers within the Fayette County Groundwater Conservation District

Dear Sirs:

On February 1, 2010, our Board of Directors approved the following proposed desired future conditions to be presented for consideration by the member districts of GMA 12.

Aquifer	Proposed Desired Future Condition	Comments
Carrizo	Limit the drawdown of the water levels to an average of 60 feet of the year 2000 conditions.	
Queen City	Limit the drawdown to an average of 60 feet of the year 2000 conditions and limit the drawdown in the outcrop to an average of 5 feet.	
Sparta	Limit the drawdown to an average of 60 feet of the year 2000 conditions and limit the drawdown in the outcrop to an average of 5 feet	

---

**Directors:**

Robert Leer - Precinct 1  
 Charles Richter - Precinct 3  
 Leo Wick, Sr - At Large

L. J. Calley - Precinct 2  
 Leo Kainer - Precinct 4

Yegua-Jackson	Limit the drawdown to and average 50 feet of the current conditions, based on available data, and limit the drawdown in the outcrop to an average of 5 feet	This aquifer is not addressed in the Region K Water Plan as of yet. TWDB will have modeling available for this aquifer in 2010.
Colorado Alluvium	Limit the drawdown to an average of 30 feet of the current conditions, based on available data.	Region K does not address this aquifer in the Water Plan.

Respectfully submitted,

David A. Van Dresar  
General Manager
