

Simsboro Aquifer

“Although the [Post Oak] allocation rate [of 2 acre-feet/acre] is not expected to change within the foreseeable future, [Post Oak] rules allow a maximum reduction in the allocation rate of no more than two percent per year. Any such future reduction in the allocation rate by [Post Oak] would have little impact on the Vista Ridge Project to maintain their permitted production rate because of 25,000 acres of excess groundwater leases. [Post Oak] allows water rights holders to apply for permits at any time, even during times of allocation reduction. Therefore, were a reduction to be imposed, the Vista Ridge Consortium would apply for additional production permits using a portion of their excess groundwater lease holdings.”

Vista Ridge Project Proposal – July 2011

Water Level - Rockdale Well #10
