**6. Work with Deanville WSC on water level monitoring.**

Mr. Bazan reported on a 23 foot drop in the water level of one of Deanville WSC's water wells. Mr. Bazan provided discussion of ongoing investigation and evaluation of the situation, including additional wells being added in the area and additional information being obtained from other producing wells in the area. Mr. Bazan also reminded all the well is not in danger of losing capacity or capability for production as there is still more than 650 feet of water in the well. Director Goetsch expressed concern and asked for additional monitoring of this and other wells in the area. After further discussion by the Committee, Mr. Bazan was instructed to continue to investigate this situation and closely monitor this and other wells for future water level changes. No action was taken.
