

Report on current and future work by the POSGCD Rules Committee
Submitted by Robert Ware, Chair

Additional Members: Sidney Youngblood, Tommy Tietjen, Chris Whittaker

December 4, 2018

There have been two Rules Committee Meetings to date in 2018.

1. April 3, 2018 – The committee reviewed recommended amendments for clean-up submitted by the District’s general counsel. At this meeting the committee also received input and recommendations from Curtis Chubb and Mike Connor on possible additions and amendments to the Rules.

2. July 10, 2018 – The committee received a presentation from Curtis Chubb representing the Central Texas Aquifers Coalition (CTAC), and reviewed recommendations from CTAC. These recommendations were then discussed by the committee and staff.

Current status of work to be performed by the Rules Committee:

The Rules Committee will receive input from the DFC Committee on recommendations for the Rules Committee concerning the District’s Rules after the DFC Committee evaluates the affects of the updated Central Carrizo-Wilcox/Queen City-Sparta Groundwater Availability Model. At that time the Rules Committee will consider all work and submissions to date.
