Proposed Desired Future Condition(s)

Please be as detailed as possible in describing your proposed DFC. Include the quantifiable value and a description of the method for measuring or calculating the value. Attach additional pages as needed.

Aquifer	Proposed DFC and Measuring/Calculating Method

Aquifer	Proposed DFC and Measuring/Calculating Method

Consideration of Proposed Desired Future Condition(s)

The Texas Water code requires that the GMA develop DFCs that “provide a balance between the highest practicable level of groundwater production and the conservation, preservation, protection, recharging, and prevention of waste of groundwater and control of subsidence in the management area.” In the space below, or on additional attached pages, please provide your considerations with regard to the nine items that must be considered, per the Texas Water Code, for the proposed DFC(s).

Consideration 1 – “Aquifer uses or conditions within the management area, including conditions that differ substantially from one geographic area to another:” _____

Consideration 2 – “The water supply needs and water management strategies included in the state water plan:” _____

Consideration 3 – “Hydrological conditions, including for each aquifer in the management area the total estimated recoverable storage as provided by the executive administrator, and the average annual recharge, inflows, and discharge:” _____

Consideration 4 – “Other environmental impacts, including impacts on spring flow and other interactions between groundwater and surface water:” _____

Consideration 5 – “The impact on subsidence:” _____

Consideration 6 – “Socioeconomic impacts reasonably expected to occur:” _____

Consideration 7 – “The impact on the interests and rights in private property, including ownership and the rights of management area landowners and their lessees and assigns in groundwater:” _____

Consideration 8 – “The feasibility of achieving the desired future condition:” _____

Consideration 9 – “Any other information relevant to the specific desired future conditions:” _____
