RE: Request for Waiver to the Board of Directors  
Beaver Creek WCID #1 Project, Snook, TX.

Within the last few months, our company was awarded a bid for (2) public water supply wells within the Beaver Creek WCID #1. These awarded wells have been approved by the TCEQ, and notably, with the POSGCD organization for municipal water usage.

Given the scarcity of available supply drilling water near these sites, J&S has filed a request for the permitting of (2) small diameter water wells which will be utilized in the drilling and construction process of the larger, public wells. We are requesting a waiver and immediate permitting due to the tight time constraints presented within our contract. Both wells will be used for a total period not to exceed 120 days, and the overall pumpage from each well is estimated to be around 50,000 gallons. Neither of these proposed wells will be completed in similar aquifers as the larger wells within the project.

J&S will subsequently plug and abandon these supply water wells upon completion of the project, and file the proper documents with POSGCD, as well as the TDLR as required.

Thank you for your consideration and expediency in this matter.

Kind Regards,

Monte D. Richardson
