Subject: DFC

Mr. Sidney Youngblood, Board President
Post Oak Savannah Groundwater Conservation District Burleson and Milam Counties

I would urge you and the Board of Directors to reject the proposed DFC. This plan would have a tremendous negative impact on our groundwater, rivers and other waters. We know that the groundwater will not replenish itself under the current conditions with our rain-deficit and hot weather.

Please do not allow these big companies to draw water that we here for our community and next generations, for our farmers and their livestock/produce and for our general needs.

Thank you for making the right decision.
