Dear Post Oak Savannah Groundwater Conservation District Board President,

Thank you for volunteering for this critical position as stewards of our ground water and river ecosystem health. It is so important to the health of the environment and economic viability of our communities. I appreciate you are in a very stressful position with threats of litigation, and companies wanting to market the valuable water resources. Your challenges continue but this is your opportunity.

You must choose between what is good enough to get by and what is right to do. The proposed DFCs will ultimately deplete ground water and flowing streams. Please reject the proposed re-adopt the current DFC's until such time dependable sustainable solutions for aquifer management are agreed upon.

Please find the courage to adopt DFC's that will protect, long term, the environment and current landowners' water access and install monitoring wells to verify the effectiveness.

Sincerely,

mcv
Miriam Vaughn
