

The number of wells in our Monitoring Network currently is at 395 and is broken down by formation as such:

Aquifer	# of Monitoring Wells
Hooper	54
Simsboro	64
Calvert Bluff	69
Carrizo	118
Queen City	39
Sparta	24
Yegua-Jackson	20
Brazos River Alluvium	7

Field Staff has been steadily working with private well owners identified under the Groundwater Annual Needs Assessment (GANA) that would qualify for well services under the Groundwater Well Assistance Program (GWAP). Efforts have also focused on locating additional monitoring wells and equipping wells for long-term water level measurements near the SLR property (previously Alcoa) to collect base line data prior to pump tests and future long-term production under the SLR Permit. Water Level Measurement Campaigns for the remainder of the year will run as follows: (may vary depending on logistics)

July 1, 2022 – August 31, 2022 (Select Wells)

September 19, 2022 – December 15, 2022 (All Wells)
