Re: Clay Water Supply Corporation ("CWSC")
Post Oak Savannah Groundwater Conservation Grant 2021

Dear Mr. Westbrook:

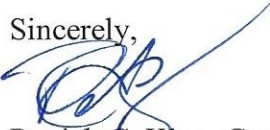

Clay Water Supply Corporation respectfully requests an extension to complete the work associated with the grant project. While this work is underway, we do not believe it will be completed within the allotted time frame.

In November 2021, Clay WSC retained the professional engineering services of Burgess & Niple, Inc. This led to an extensive study to determine a course of corrective action. This led to two recommendations; (1) to proceed with a gaseous chlorine and gaseous ammonia system and, (2) install a granulated activated carbon filter on the well. The second recommendation is based on the outcome of the first recommendation.

On July 19, 2022, a submittal to TCEQ for approval to proceed with recommendation No. 1. We have obtained quotes for this work and on August 4, 2022, a notice to proceed was issued to DNA Chem Inc.

A six month extension is respectfully requested. We believe that this will be sufficient to obtain and install the chloramine system, barring delays with parts. I appreciate your consideration of this request. If you have any questions, please do not hesitate to contact me by calling (512) 845-3230 or email pck@pgms.net.

Sincerely,

Patrick C. King, General Manager
Cade Lakes Water Supply Corporation
