

The number of wells in our Monitoring Network currently is at 412 and is broken down by formation as such:

Aquifer	# of Monitoring Wells
Hooper	58
Simsboro	67
Calvert Bluff	70
Carrizo	123
Queen City	43
Sparta	24
Yegua-Jackson	20
Brazos River Alluvium	7

A steady effort continues of locating additional monitoring wells and equipping wells for long-term water level measurements near the SLR property (previously Alcoa) to collect base line data prior to pump tests and future long-term production under the SLR Permit.

Field Technicians are currently collecting data at all Active Monitoring Wells. The campaign for this effort will conclude by the middle of December 2022
