**Affidavit**

I, Alan L. Gardenhire, Vice President of Operations, SLR Property I, LP (SLR), hereby certify, to the best of my knowledge, the following facts:

1. On December 9, 2022, the attached letter and notice regarding SLR's applications to Post Oak Savannah Groundwater Conservation District for (1) a new 15,000 af/yr Simsboro Operating Permit and (2) a new 9,000 af/yr Simsboro and Hooper Drilling and Operating Permit were given to 67 landowners (65 mailed via U.S. Postal Service Priority Mail with Delivery Confirmation and 2 hand delivered). Per Milam County Appraisal District, since cemeteries are tax-exempt, there is no address on file, so the 2 cemeteries on the list were not sent letters.
2. A list of the landowners and their addresses is attached to this document.

Enclosure

NOTICE OF A PUBLIC HEARING  
POST OAK SAVANNAH GROUNDWATER CONSERVATION DISTRICT

January 10, 2023, 5:30 P.M.

Post Oak Savannah Groundwater Conservation District Offices

310 East Avenue C, Milano, Texas 76556

The Board of Directors of the Post Oak Savannah Groundwater Conservation District (District) will hold a public hearing in the Post Oak-Savannah Groundwater Conservation District Offices, 310 East Avenue C, Milano, Texas 76556, on Tuesday, January 10, 2023, at 5:30 P.M., for the purpose of receiving public comments on the following applications.

Notice is hereby given of the following public hearing that will be held at the time and place listed above on the following applications, to-wit: an Application for a New 9,000 acre-feet per year (af/yr) Simsboro and Hooper Drilling and Operating Permit, and an Application for a New 15,000 af/yr Simsboro Operating Permit.

The applicant is SLR Property I, LP (SLR, or the Applicant), whose address is: 2825 Oak Lawn Avenue, Dallas, TX 75219. SLR submitted these applications on October 17, 2022.

SLR requests a new Drilling and Operating Permit to produce up to 9,000 af/yr from the Simsboro formation, and up to 4,500 af/yr from the Hooper formation, provided that the total production in any one year may not exceed 9,000 acre-feet. SLR requests authorization to drill and operate up to a total of 60 new wells (up to 30 new Simsboro wells and up to 30 new Hooper wells), at 30 defined well sites. Figures 1 and 2 included as part of this notice show the locations of the 30 proposed new Simsboro wells (identified as OP9-1 through OP9-30) and the 30 proposed new Hooper wells (identified as OPH9-1 through OPH9-30). The location and production capacity for each proposed new well are shown in Tables 1 and 2 included as part of this notice. The approximate center of each of the 30 defined well sites is a point midway between the location of each proposed new Simsboro well and the location of the same-numbered proposed new Hooper well. To provide flexibility, SLR requests authorization to drill more than one Simsboro well at a given well site, and/or more than one Hooper well at a given well site, depending upon conditions found at each well site. The total combined production capacity of all wells constructed at a given well site that are screened into the same formation will be less than or equal to the production capacity defined for the one well identified in the application for production from that formation at that well site.

SLR requests that the water produced under the new 9,000 af/yr Simsboro and Hooper Drilling and Operating Permit be authorized to be used for municipal, industrial, manufacturing and commercial purposes anywhere within Milam and Burleson Counties.

SLR requests that the term of the new 9,000 af/yr Simsboro and Hooper Drilling and Operating Permit be 40 years from the date of issuance of the permit.

Additionally, SLR seeks a new 15,000 af/yr Simsboro Operating Permit to be used in conjunction with SLR's 15,000 af/yr Simsboro Historic Use Permit No. 0330 ("Permit 0330"). As noted in the application, there would be a cap of 15,000 af/yr on total production under both permits. SLR

requests that upon issuance of the new 15,000 af/yr Operating Permit, the entire 15,000 af/yr will be assigned to Permit 0330 and 0 af/yr per year will be assigned to the new Operating Permit. From time to time thereafter, SLR will notify the District of the portion of the 15,000 af/yr assigned to the new Operating Permit and noting the remaining portion of the 15,000 af/yr that will remain assigned to Permit 0330. At the District's insistence, SLR has agreed that the amount assigned to Permit 0330 may never be increased above the last amount assigned. If Permit 0330 is ever terminated for any reason, the amount assigned to Permit 0330 at that time would be assigned to the new Operating Permit, resulting in the full 15,000 af/yr being assigned to the new Operating Permit.

Water produced under the new Operating Permit will be pumped from the Simsboro formation using the same 61 wells authorized under Permit 0330. Figure 3 included as part of this notice shows the locations of the 61 wells authorized under Permit 0330. The location and approved production capacity for each authorized well under Permit 0330 are included in Table 3 included as part of this notice. If an authorized well operating at the approved production capacity for water produced under Permit 0330 does not meet current District property line setback or well spacing regulations for new wells, the District may approve a lower production capacity for water produced from that well under the new 15,000 af/yr Simsboro Operating Permit.

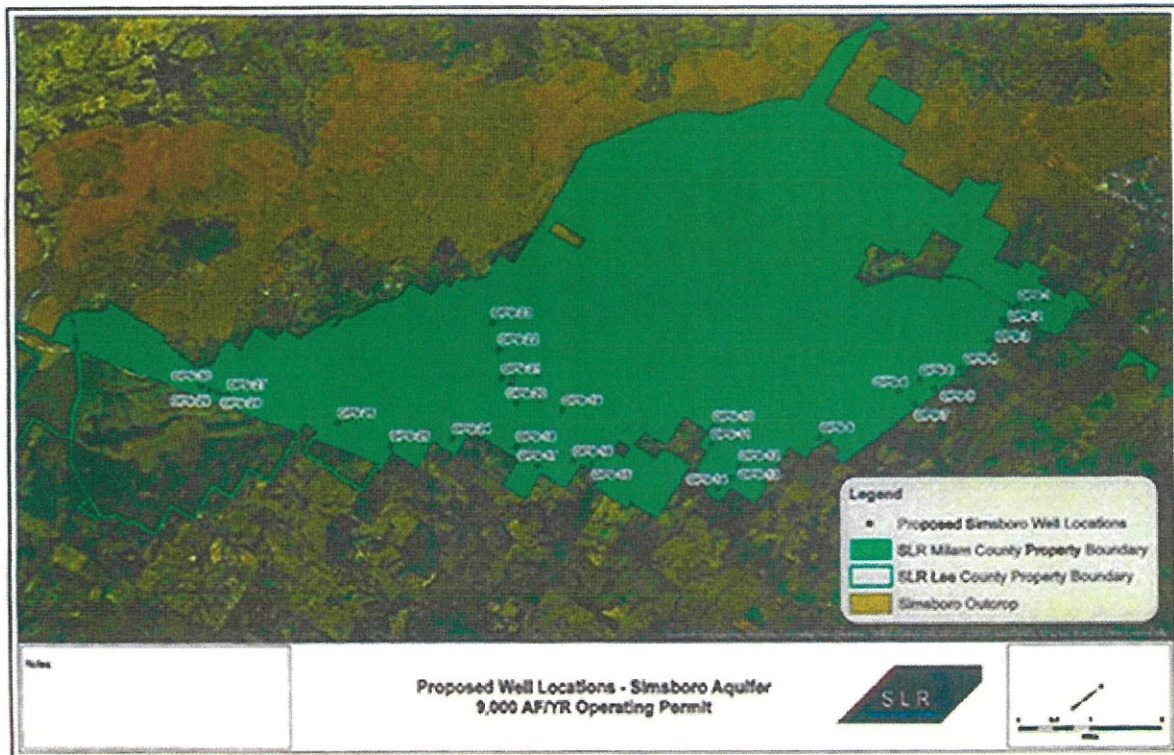

SLR requests that water assigned to and produced under the new 15,000 af/yr Simsboro Operating Permit and reduced from Permit 0330 be authorized to be used for municipal, industrial, manufacturing, and commercial purposes anywhere within Milam and Burleson Counties.

SLR requests that the term of the new 15,000 af/yr Simsboro Operating Permit be 40 years from the date of issuance of the permit. Permit 0330 was effective December 11, 2007 and its term is through December 31, 2038. SLR is not at this time requesting renewal of Permit 0330.

Figure 4 included as part of this notice shows the location of SLR's Milam County property in relation to the City of Rockdale and other cities and towns, Milam County boundaries, and certain roads and highways.

Documents related to the above referenced applications and public hearing are available for inspection, review, and copying at Post Oak Savannah Groundwater Conservation District offices, located at 310 East Avenue C, Milano, Texas. Persons wishing to be heard as a potential party to the hearing on the applications must notify the General Manager in writing at least five (5) business days before the hearing at 310 East Avenue C, Milano, Texas 76556. Any affected person who intends to contest one or both applications must provide timely written notice of that intent to the Applicant and to the District. The notice to the District shall be to the District offices located at 310 East Ave C, Milano, Texas 76556. Notice of intent to contest must be given at least five (5) business days prior to the date of the hearing. Such notice shall be given to both the Applicant and to the District and shall be delivered at least five (5) business days prior to the date of the hearing. A copy of the documents and applications are available to the public during office hours from 8:00 a.m. until 4:00 p.m., Monday through Friday.
