Work Experience

Project Planner/Scheduler

Blue Bell Creameries, L.P. - Brenham, TX

August 2018 to Present

- Research new technology, regulations for building and manufacturing equipment and determine methods for application for complex systems.
- Develop strategies for implementation of new technology and see projects through to fulfillment
- Improve throughput and increase efficiencies through analytical processes and audit programs
- Maintain high quality standards through updating equipment and process systems
- Ensure manufacturing goals and needs are able to be met. Example: expanded boiler plant and facilitated demolition, construction, and installation of new system. Roughly 3MM in total, completed a month ahead of schedule and under budget.

Project Engineer/Manager

Knife River - Bryan, TX

June 2018 to August 2018

- Plan, direct, and coordinate daily, weekly, monthly, and longer project work to ensure goals and manage projects in 1-15MM range
- Facilitate objectives of long and short term projects
- Manage time and project timelines with respect to personnel, cost management/control, and entire branch projects
- Oversee 9 superintendents and communicate with all materials supply groups such as concrete, asphalt, construction, trucking, and maintenance.

Regulatory Compliance Coordinator

Blue Bell Creameries, LP - Brenham, TX

July 2015 to June 2018

- Developed and instituted procedures that reduce bulk fuel quality related break downs by 100%
- Standardized fuel monitoring and filtration practices at the Corporate Level for all 4 plants and all 40 branches
- Ensure compliance in environmental quality with state and local governments in over 20 different states
- Remedied Storm Water Permit Plan compliance issues by identifying plan deficiencies and mitigating them
- Obtained certification as a Level II NDT Inspector in Process Safety Management
- Reduce existing NH3 cooling system footprint by 2/3's in a space where size was the limiting factor

- Perform routine site inspections of various facilities to ensure adherence to multiple codes and permit plans
- Manage petroleum related inventories in excess of \$3M as well as assets in excess of \$2M
- Perform Hazard Analysis for Critical Controls Points to develop the company's HACCP Plan
- Personally prepare annual Waste Water Permit Applications for 2 complete plants and assist with others
- Generate Standard Operating Procedures at the Corporate Level by implementing technical writing skills
- Established procedures for removal of questionable equipment and machinery company-wide
- Orchestrated the removal of \$3M worth of un-fit for service equipment to ensure re-start deadline

Engineering Research and Development

Blue Bell Creameries, LP - Brenham, TX

January 2015 to July 2015

- Pioneered best engineering practices for use in Food Manufacturing
- Personally standardized water and sanitizer dispensing systems at all plants
- Assimilate information pertaining to complex and diverse issues ranging from security to engineering
- Communicate with vendors and obtain pricing for applications ranging from components to proposals
- Research numerous technical methods and apply data to determine feasibility and practicality of implementation
- Communicate tirelessly with various upper level management in regard to best practices
- Remain focused and dedicated amidst seemingly insurmountable odds
- Put in the time and effort to carry out the duties above and beyond the requirements of a research engineer
- Perform Hazard Analysis to develop Critical Controls Points to develop the company's HACCP Plan
- Built extensive contact list with equipment locating companies ranging from Riggers to Manufacturers

Senior Process Supervisor

Blue Bell Creameries, LP - Brenham, TX

January 2012 to January 2015

- Schedule and coordinate logistics for various materials of \$1M - \$6M weekly
- Reduce down time by 30% by developing and enforcing strict preventative maintenance guidelines
- Implement management skills to maximize efficiency for a workforce of 40 employees on a daily basis
- Coordinate annual, semi-annual, monthly, weekly, and daily schedules for employees
- Routinely evaluate, reprimand, and formally discipline human resources as required
- Interview and evaluate applicants
- Prepare and administer training presentations for standard operating procedures and industry specific topics
- Develop chemical standardization procedures to be implemented at a Corporate Level

Process Supervisor

Blue Bell Creameries, LP - Brenham, TX

July 2008 to January 2012

- Coordinate oversight of preventative maintenance for a widely varying range of department assets
- Maintain concise and effective records for all governing agencies
- Successfully manage improvement projects for process systems of up to \$100K per project
- Perform effectively under demanding schedules and in non-ergonomic environments daily to maximize production

- Manage chemical inventory and associated equipment maintenance company-wide up to \$200K annually
- Maintain industry specific certifications and permits
- Act as emergency sealer for the State Health Department to Blue Bell

Field Engineer

Weatherford International - Alice, TX

June 2008 to July 2008

- Maintain and service key accounts in excess of \$1M
- Develop, catalogue, and maintain filing system for client information
- Perform job specific analysis as well as prepare subsequent technical reports
- Configure, repair, and calibrate equipment
- Exercise safe handling practices for radioactive and explosive sources

Superintendent Assistant

Garrett Mechanical, Inc - Bryan, TX

September 2007 to May 2008

- Supervise a crew of 5 - 10 employees on a daily basis
- Ensure timely completion of scheduled deadlines
- Effectively communicate with clients in regard to project status updates and change orders
- Abate, repair, maintain, and install various mechanical equipment
- Perform preventative maintenance on mechanical equipment and repair as needed
- Install plumbing fixtures
- Utilize a wide array of power tools to complete various tasks
- Operate and move heavy machinery
- Inspect work zones daily for compliance with OSHA standards
- Gain knowledge and practical exposure to mechanical systems

Student Technician III

Texas A&M University - College Station, TX

February 2007 to August 2007

- Fabricate equipment needed for research projects in order to conserve budget funding
- Operate various machinery from heavy equipment to machining tools on a daily basis
- Manufacture alternative fuels and conduct tests as per ASTM standards
- Conduct research for graduate students and adhere to strict monitoring codes
- Reliably collect data in a timely and concise manner
- Record and interpret results from test iterations as per laboratory operating procedures
- Implement the scientific method to guarantee the success of the projects
- Identified and prevented errors from senior students that saved several thousand dollars on materials and time

Shift Leader

FourPZ Pizza Hut - Caldwell, TX

March 2004 to January 2007

- Ensure successful shift operation to maintain customer and franchise satisfaction
- Exceed sales targets while keeping labor and ingredient cost to a minimum
- Meet ingredient cost goals to maximize bonus structure
- Perform human resource management tasks

- Practice and implement effective time management skills
- Consolidate and reconcile credits and debits daily
- Prepare deposits twice a day and maintain acceptable petty cash on hand
- Plan and forecast daily material requirements
- Provide monthly inventory analysis
- Schedule and manage labor as needed on a weekly and daily basis
- Evaluate, discipline, terminate, and hire human resources as needed

Education

BS in Engineering, Systems Management, Business, Economics

Texas A&M University - College Station, TX
2003 to 2008

Skills

- Microsoft Office (10+ years)
- Maximo (8 years)
- Oracle (8 years)

Awards

Overall Best Process Improvement Award

2009

Improved process company-wide resulting in major cost savings

Overall Best Process Improvement Runner-Up Award

2014

Analyzed, improved, and solved major processing issue company-wide

Certifications and Licenses

First Aid/CPR/AED

October 2018

Forklift Operator Certification

November 2018

Scissorlift Operator Certification

November 2018

HAZWOPER

November 2017

OSHA 30

Level II NDE PSM Inspector

February 2021

Boiler - Steam Production
