

Monitoring Network Update:

April 05, 2023

The number of wells in our Monitoring Network currently is at 421 and have been categorized by formation in the table below:

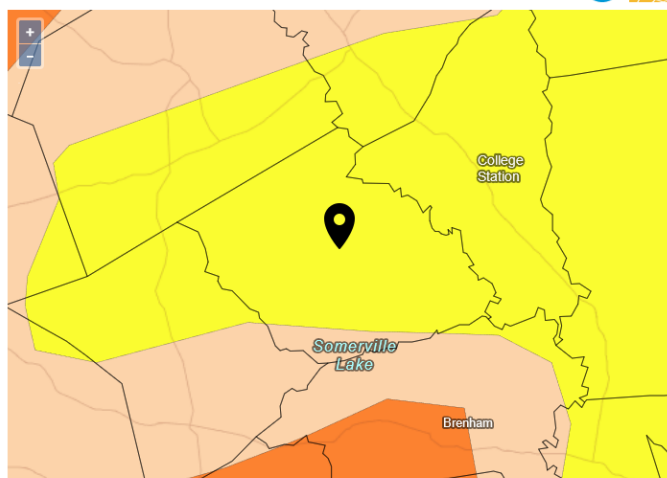

Aquifer	# of Monitoring Wells
Hooper	58
Simsboro	68
Calvert Bluff	71
Carrizo	130
Queen City	43
Sparta	24
Yegua-Jackson	20
Brazos River Alluvium	7

Currently, the Q1 Monitoring Campaign is underway with monitoring efforts on track to be completed by mid-April. Additional sites are being evaluated for monitoring efficacy and prioritization.

A steady effort continues of locating additional monitoring wells and equipping wells for long-term water level measurements near the SLR property (previously Alcoa) to collect base line data prior to pump tests and future long-term production under the SLR Permit.
