

## Monitoring Network Update:

August 8th, 2023

The number of wells in our Monitoring Network currently is at 428 and have been categorized by formation in the table below:

Aquifer	# of Monitoring Wells
Hooper	58
Simsboro	68
Calvert Bluff	75
Carrizo	133
Queen City	44
Sparta	24
Yegua-Jackson	20
Brazos River Alluvium	7

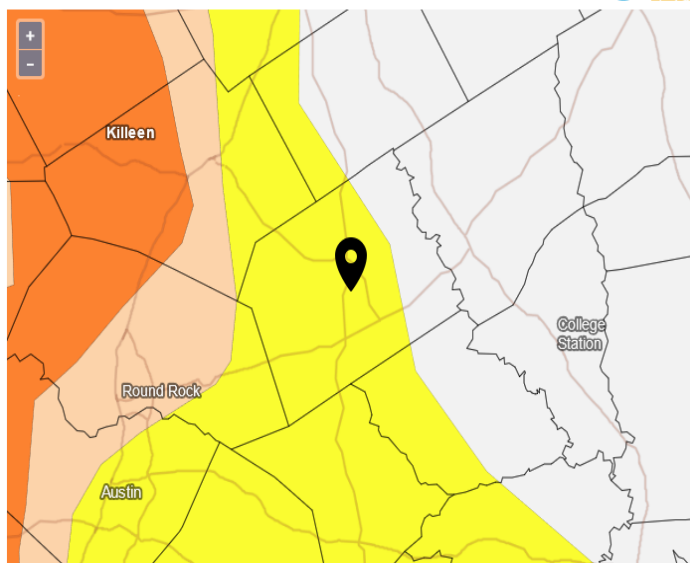

A steady effort continues of locating additional monitoring wells and equipping wells for long-term water level measurements near the SLR property (previously Alcoa) to collect base line data prior to pump tests and future long-term production under the SLR Permit.
