Re: City of Thorndale - Water Meter Replacement Project

Dear Mr. Westbrook,

The City of Thorndale respectfully requests an extension to the POSGCD Conservation Grant that the City received for the purpose of switching to new digital water meters and to progress towards an AMI System. Due to several unforeseen delays in project the City of Thorndale would like to request an extension on the Conservation Grant from POSGCD. The delays that the City of Thorndale have encountered are mainly due to the delivery and receipt of the cellular endpoints which would allow the City of Thorndale to transition to a full AMI System.

The City of Thorndale has received the digital water meters for the project however, the delivery of needed endpoints for the project has encountered several delays. The City of Thorndale is hopeful to have receipt of the needed endpoints by mid-October and anticipate starting the water meter replacement project the first week of November 2023.

If you have any questions, please feel free to give me a call. Thank you for your time and consideration!

Sincerely,

Ray Miller, Jr.  
City Administrator  
City of Thorndale
