WELL INSPECTION FOR INTERLOCAL AGREEMENTS

For the month of January, the inspections, as required by the interlocal agreement and District, is broken down below.

Burleson County – Performed a total of 6 septic inspections. 0 of the inspections had wells associated with the property. The reason for the low number of inspections was due to the amount of rainfall received in the area.

Milam County- I have not received a report from Milam County as of 2/12/2024.
