WELL INSPECTION FOR INTERLOCAL AGREEMENTS

We had the Interlocal Agreement training on November 6, 2024 at the District where TDLR and District staff provided water well inspection training. 2 representatives from Burleson County, 2 Representatives from Milam County, 5 District staff and 1 Staff from Clearwater GCD were in attendance.

For the month of October 2024, the inspections, as required by the interlocal agreement and District, is broken down below.

Burleson County – Performed a total of 10 septic inspections. Out of the 10 septic inspections, 2 involved water wells.

Milam County- I have not received Milam County's counts. However, we are working on a backlog of data that they need to submit to the District and I plan on having updated information in the near future.

At Post Oak Savannah Groundwater Conservation District we aim to secure water for future generations through data collection, mentoring, regulation, and public education, in alignment with the Texas Water Code's preference for groundwater conservation districts. Learn more at: www.posgcd.org.
